- INVESTMENT INVOLVES RISKS. Past performance is not indicative of future results.
- Investors should read and understand the Fund's most current offering document, including details of risk factors relevant to the Fund before making an investment in the Fund.
- The Fund may take significant, long-term positions that the Investment Manager believes are undervalued by the market. Companies in which such Funds invest may remain out of favour with the market for extended periods of time. Such Funds may continue to hold, and in some cases add to, a declining position so long as the relevant Investment Manager continues to view the market as incorrectly valuing the security. As a result, the Fund may face the risk of mis-estimation by the Investment Manager in its fundamental analysis regarding the companies in which the Fund invests. The performance of the Fund may not closely correlate to specific market indices over time and may include extended periods of underperformance as compared to the broader market.
- An investment in the Fund may not be suitable for all investors. The investment decision is yours but you should not invest in the Fund unless the intermediary who sells it to you has advised you that it is suitable for you and has explained why, including how buying it would be consistent with your investment objectives.
